

Mallorca - Valledemossa Spring 2017 Update

Green hatched area is Finca Publica Son Moragues. Red hatched area is private finca requiring Access Permit.

Due to the number of hikers, principally guided groups, using the routes out of Valledemossa the authorities have introduced an Access Permit system for the routes crossing the private finca north of the town, and have re-routed the GR221 to avoid the private finca.

Full information, including the Access Permit online application, is available from the official website <http://muntanyadelvoltor.com> which also includes gpx records of the 'official' trails.

We recommend that you print the updated map above to use for this region of Mallorca. A digital Custom Map edition 'MalVal2017' is available as free download from Discovery Walking Guides website at <http://www.dwgwalking.co.uk/freedigitalmaps.htm>

Changes to Walk! Mallorca routes are:

40 Valledemossa: The Archdukes Path, this now requires a permit.

41 Valledemossa: Teix, this is now an 'out and back' route using the track up to the Refuge; the old route from waypoints 3 to 19 is now strictly private with no access.

49 Valledemossa to Deia: requires a permit in its original form. Without a permit use either 41/GR221 along the Refuge track, or 40 Fontanelles section to join the GR221.

Our thanks to Eryk Grant for this important update. David & Ros Brawn and Charles Davis May 2017
